Summary Profile

Informatics Engineering graduate from Airlangga University with hands-on experience developing and deploying AI and Machine Learning solutions across the development lifecycle, from data preprocessing and model development to evaluation, integration, and deployment. Skilled in Python, Machine Learning, Generative AI, LLM, RAG, Computer Vision, NLP, and SQL, with experience applying AI to real-world business and operational use cases. Experienced in translating business requirements into practical AI solutions and collaborating across teams to deliver production-oriented applications.

Education

Airlangga University | Informatics Engineering | GPA: 3.66/4.00

2022 - 2026

Certification

BNSP | Associate Data Scientist | 2025 - 2028

BPSDMP KOMINFO | Associate Data Scientist | 2025 - 2028

CISCO | Cisco NDG Linux Unhatched | 2024

IBM | Code Generation and Optimization | 2025

Work Experience

PT QLCOM Solusi Bisnis Digital

Surabaya, East Java

AI and Business Intelligence Engineer

November 2025 - September 2026

- Developed and deployed end-to-end AI and Machine Learning solutions, covering data preprocessing, model development, testing, evaluation, integration, and deployment using Python and web-based technologies.
- Developed and evaluated Machine Learning and predictive analytics models for real-world business use cases, including sales forecasting, fraud detection, customer analysis, and product analysis.
- Developed LLM-based and NLP solutions, including RAG-based applications and AI chatbots, and integrated Generative AI capabilities into business and enterprise workflows.
- Developed Computer Vision and document processing applications, including face recognition attendance and OCR invoice processing, using TensorFlow and OpenVINO.
- Integrated AI, Machine Learning, and data-driven solutions into ERP and business applications, including sales analytics, inventory, purchasing, receivables, cash flow, and business performance monitoring.
- Led the AI team while remaining hands-on in technical development, collaborating with stakeholders to translate business requirements into practical AI solutions and supporting solution improvement and deployment.

Private Tutor

Surabaya, East Java

Teacher

2021 - Present

- Provided private tutoring for elementary to high school students across various subjects based on the Merdeka and Cambridge curriculum.

Freelance Website Project

Surabaya, East Java

Fullstack Web Developer

2021 - Present

- Developed freelance web and UI/UX projects for clients across e-commerce, retail, beauty, furniture, and company profile.
- Handled projects from requirements analysis and UI/UX design to development, database integration, and final implementation.

PT JASA MARGA (PERSERO) TBK. X KEMENDIKBUD

Surabaya, East Java

Research Assistant & Database Engineer

April 2023 - Juni 2024

- Developed the Genius Parking Space Detection System as a Data Engineer and Research Assistant using Computer Vision and CCTV data to support automated parking-space detection.
- Designed database structures using Conceptual Data Model (CDM) and Physical Data Model (PDM) to support system development.
- Developed and managed MySQL databases and prepared data to support system development and analysis.
- Supported technical documentation and project coordination with the research team and PT Jasa Marga (Persero) Tbk.

DIPP Universitas Airlangga

Surabaya, East Java

Data Management Entry

February 2024 – March 2024

- Processed, verified, and structured high-volume student course records across multiple faculties to ensure 100% data consistency in university databases.
- Audited and maintained academic files to eliminate data discrepancies, supporting seamless administrative reporting and timely course enrollment.

Internship Experience

BID TIK POLDA JAWA TIMUR

Surabaya, East Java

Fullstack Developer

August 2025 - November 2025

- Developed and deployed an IT Troubleshooting Guidance System that enabled users to independently access solutions and step-by-step procedures for common IT issues, based on an internal knowledge base.
- Translated IT troubleshooting requirements into a structured knowledge-based system, covering system design, development, testing, and deployment.
- Supported independent IT issue resolution by providing accessible troubleshooting guidance before users contacted the IT Support team.

Project

Universitas Airlangga

Surabaya, East Java

Data Science and Machine Learning Project

August 2024 - June 2025

- **Heart Disease Prediction Web App (Team Project – AI Lead):** Built and optimized machine learning classification models using Python to assess patient cardiovascular risks; preprocessed clinical datasets and prepared model inference pipelines for seamless web integration.
- **Lung Cancer Detection System (Team Project – ML Engineer):** Designed the predictive AI pipeline by transforming symptom-based clinical data and evaluating classification algorithms to identify and score high-risk patient indicators.
- **Indonesian Food Classification & Recommendation (Individual Project):** Engineered an end-to-end data-driven food recommendation system; processed raw culinary datasets from Kaggle and implemented classification models in Python to automate personalized meal suggestions.
- **Bank Queue Management System (Individual Project):** Developed an end-to-end bank queue management system with customer queue registration, queue monitoring, and real-time currency exchange rate integration through an external API to support streamlined banking service operations.

Award & Achievement

International Short Course Program to Malaysia

May - Juni 2025

The program focused on Information Technology, IoT, smart systems, digital solutions, and community engagement through collaboration with international students.

High-achieving students of the Vocational Faculty at Universitas Airlangga

Recognized as one of the top high-achieving students (selected from 50 students) in the Major Informatics Engineering.

Organization	Language	Tech Stack	
• HIMA Informatics Engineering Department Secretary • HIMTI CARES Chief Executive • BEM Faculty of UNAIR Staff • Airlangga International Conference Committee Member • International Student Program Group Leader	• Indonesian (fluent/native level) • English (intermediate level) • Arabic (professional level)	• Flask • Vue.js • SQL • MySQL • Machine Learning • LLM & Generative AI	• Python • PHP • Laravel • Java • HTML • CSS
